Perkins. 1676.

A Prognostication for the year of our Lord God, 1676.

Being the Bissextile, or *Leap-year*, and from the Worlds Creation, 5639.

Wherein is contained the description of the four quarters of the year: As also a Chronological Table of many things worth remembrance, since the Creation, until this present year, 1676. Collected for the most part out of Ecclesiastical History, and other good Authors, somewhat augmented.

By F. Perkins, Well-willer to the Mathematicks.

Printed at *London* by *Robert White*, for the Company of Stationers, 1676. *Cum Privilegio.*

A Description of the four Quarters of the Year, and first of Winter.

☉ in ♑ ♒ ♓.

ACcording to the custom of writers in this kind, Winter Quarter is the first Quarter, which took beginning the 11. day of *December*, at which time the Sun entred into the first degree of the cold and dry sign Capricorn, being the most remote from us in his farthest South declination, causing the days with us to be shortest, and the nights longest: Which Quarter continuing until the Sun hath slowly passed through *Capricorn*, *Aquarius*, and *Pisces*. This Quarter doth naturally resemble Old age.

Of the Spring.

☉ in ♈ ♉ ♊.

THis Quarter doth take beginning the 10. of *March*, at which time the Sun entreth into the first minute of *Aries*, and doth continue whilst the Sun is passing these 3. vernal signs, *Aries*, *Taurus*, and *Gemini*. This Quarter doth resemble growing youth.

Of Summer.

☉ in ♋ ♌ ♍.

THe Summer Quarter doth take his beginning when the Sun doth enter into the first degree of *Cancer*, which will be this year the 11. of *June*, and doth continue whilst the Sun passeth through *Cancer*, *Leo*, *Virgo*, now are the days longest, and the air hottest; therefore but for necessity, bid Physick Adieu.

Of Autumn.

☉ in ♎ ♏ ♐.

AUtumn or Harvest Quarter (commonly called the Fall of the Leaf, of some the latter Spring) doth begin when the Sun doth enter into the first degree of *Libra*, making again the day and the night of equal length; Which will be this year, the 13. of *September*, and doth continue whilst the Sun doth pass through *Libra*, *Scorpio*, and *Sagittarius*. This Quarter doth fitly resemble declining age, and Phlegmatick complexion.

A brief Chronological Description of many things worthy of memory that have hapned from the Creation unto this present year of our Lord 1676. with the year of the World in which they happed in the first Column; faithfully collected from many good Authors.
